

FEATURING DIAMOND PRO STONE CUT™ RETAINING WALLS

Craft a More  
Beautiful World

# Inspiration at First Sight

Crafting a more beautiful world often demands a rich palette of colors and textures. That is precisely what Anchor Wall Systems offers you with the creation of the Diamond Pro Stone Cut™ system and Highland Stone® product.

Renowned for their rough-hewn faces and earthen tones, the Diamond Pro Stone Cut™ system and Highland Stone® products impart landscapes with a beauty not commonly found in retaining walls. For greater visual appeal, these blocks have an affinity with nature, enriching projects with warmth and character. What's more, Diamond Pro Stone Cut and Highland Stone products are available in multiple sizes, making curves easier to create, thus allowing more specialized applications. Even better, they're only two of the many block options available within the Anchor family of wall products—all of which deliver the distinct appearance and structural integrity needed to meet any segmental-retaining wall challenge.

DIAMOND PRO STONE CUT™ RETAINING WALL

## Meeting the New Expectation

Homebuyers' expectations aren't limited to the interior—homebuyers also insist on landscapes that please. According to Floyd Calhoun, a large residential developer, "The surrounding area has to be attractive. With the Diamond Pro Stone Cut™ retaining wall, the style, aesthetics and quality are all there; it's an awesome product. The rounded corners and distressed face are perfect. And the color—I couldn't have custom-ordered a better color for the setting."

DIAMOND PRO STONE CUT™ RETAINING WALL

## Bridging the Gap

For a true test of segmental-retaining wall strength, few projects are more demanding than land bridges. At Armistead Point, engineers designed a land bridge that is 240 feet long by 15 feet wide and provides a 250-psf traffic live load at its crest. They used Diamond Pro Stone Cut™ products as well as a load-transfer platform.

# for Critical Applications

Proven performance with legendary strength. That's the legacy of Anchor Wall Systems' retaining walls.

Architects, engineers and contractors all turn to the Diamond Pro® retaining walls for their critical wall needs. Especially now that they offer the same proven reliability with the beautiful look of quarried stone.

The performance characteristics of Diamond Pro Stone Cut™ products make them the proven solution for tall walls, transportation projects, commercial developments, water applications and other critical wall needs. Whether your site plans call for the creative use of a slope, retaining earth in a challenging environment or enhancing an area's appearance, there's no better choice than the Diamond Pro Stone Cut system.
