RETAINING WALL SYSTEMS

GREAT APPEARANCE – LOW COST – BUILT TOUGH

The 16" x 32" (0.32sqm) panels give every project the quality finish of Massive Hand-Built Stone. This Heritage appearance is comprised of 5500 psi (40 Mpa) Fiber and Steel Reinforced Concrete.

Panels can be trimmed, Left and right Cornerstones as well as Capstones and Fence components provide detail. Large Components and ease of installation keeps construction costs at a minimum.

LOCK+LOAD is 50% the weight of comparable segmental retaining walls. With the Largest Hand-Placed facing panel and LOCK+LOAD's relatively light weight (45lbs/ft²) (2.3 Kpa)- trucking and installation are also reduced.

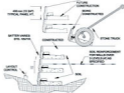

LOCK together and LOAD with soil to construct Attractive Stone retaining walls by Hand.

Superior Appearance and Performance makes LOCK+LOAD Retaining Walls the Right choice.
